

Dear Sir or Madame,

The Climate Transparency Report 2020 (formerly the Brown to Green Report) will be released on **18 November 2020**. On this occasion, we are happy to invite you to **three thematic online launch events**. Besides showing how individual countries perform compared to their G20 peers in the categories: mitigation, finance and adaptation, this year's report provides **most recent emission data for all G20 countries** as well as a comprehensive overview of **corona recovery packages**. In every event you will have the opportunity to ask our experts your questions in a 15-minute Q&A session.

Feel free to circulate this invitation to your colleagues and others who may be interested.

We look forward to your participation!
