

AMBITIOUS G20 CLIMATE ACTION THROUGH COUNTRY COMPARISON

Our global partnership examines G20 country climate action – we inform policymakers and stimulate national debate

WE RAISE CLIMATE AMBITION IN G20 COUNTRIES

16

PARTNERS

Our mission is to **encourage ambitious climate action** in the G20 countries. Being responsible for approximately 75% of global GHG emissions, G20 economies play a decisive role in reaching the goals of the Paris Agreement.

20

MAJOR
ECONOMIES

Our **global partnership** brings together experts from research organisations and NGOs in the majority of the G20 countries, who together examine climate action.

100

INDICATORS

Around 100 indicators in the areas of **adaptation, mitigation, and finance** enhance transparency and compare G20 countries to stimulate a race to the top in ambitious climate action.

WE INFORM POLICY MAKERS AND STIMULATE NATIONAL DEBATES

We show governments how countries compare, incl. to G20 averages and 1.5°C benchmarks

G20

We initiate cross-country dialogs, facilitate peer learning and identify opportunities for establishing transformative partnerships

ANALYSE

We build capacities on coal phase-out, energy transition, transport and other policy areas through policy papers and workshops

INFORM

We provide easy-to-use, comprehensive and concise information

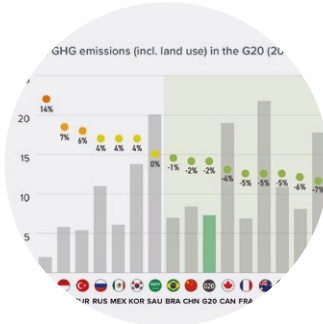

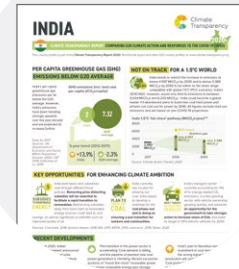

We engage with government, civil society, business and the media

COMPREHENSIVE, CONCISE AND COMPARABLE INFORMATION

CLIMATE TRANSPARENCY REPORT

Our Climate Transparency Report consists of a summary report and 20 country profiles. It is the most comprehensive yet concise annual review of climate action of G20 countries.

“The post-Corona recovery packages can lead to a greener and more just world. Unfortunately, many do not live up to that aspiration. The Climate Transparency Report provides an excellent overview of the recovery programs with good examples as well as missed chances.”

Prof. Joseph Stiglitz
Nobel laureate economist,
Columbia University

Our national policy papers provide background and recommendations on how to advance ambitious climate action on the ground.

SECTORAL POLICY PAPERS

The key areas of our sectoral work include coal transition, decarbonisation of the transport sector and energy transition in Argentina, Brazil, India, Indonesia, Mexico and South Africa.

FOCUS REPORTS

CNN, the Guardian, Le Monde, der Spiegel, infobae or The Times of India are among media covering our report. Every year it is covered in more than 40 countries and results in around 700 stories.

MEDIA OUTREACH

We provide additional analyses and recommendations for international processes in our focus reports published ahead of G20 summits or in tools such as NDC Transparency Check.
